Registered tier Amazon APN Consulting Partner

Finalist 2014
Why SAP Performance Optimization

• With time, come changes, in your SAP system too - data growth, change in business process, new interfaces and so on and on ....

• This may cause poor performing SAP ABAP programs, interruption in business processes, slow background jobs etc.

• So What to do? – Call in the experts to fine tune your SAP systems!

• Call Travanleo Info Solutions to fine tune your SAP ABAP performance.
Benefits of SAP Performance Tuning

• Improved Stability and Increased Efficiency
• Reduced Operating Costs
• Faster and more Predictable Response Time
• Reduced Business Interruptions
• Better performing Batch Jobs
• Better End User Experience
What does Travanleo® have to offer?

• Comprehensive System Analysis
  – Thorough System Check to identify bottlenecks
  – Identification of low performing ABAP programs

• Creation of Recommendation List
  – System Analysis Report
  – List of changes to be carried out –ABAP and Basis
  – Action Plan and Estimate
  – Applying the recommendation list on approval

• Verification of Tuning Results
  – System check to measure performance
  – Functional Testing for changed ABAP programs
Travanleo Approach

- Discovery Workshops & Interview Questionnaires to analyze SAP performance issues/requirements
- System verification (ST02 through ST07)
- Identification of low performing ABAP Programs using SAT, ST05, ST12, SLIN and SCI
- ABAP performance tuning to improve the performance of programs
- SAP/Database fine tuning
- Verification of Tuning Results
Key Areas in ABAP Tuning

• Restructuring of Select Queries for optimal performance
• Removal of Nested Loops/Introduction of parallel cursor if applicable
• Removal of low performance operations on internal tables
• Introduction of Parallel Processing wherever applicable
